

• Sales force automation for field teams

Every shop. Every order. Every rep.

Your reps plan their route, check in at each shop, take orders and record payments on their phones, even without signal. You see the whole day on one dashboard.

WHAT IT DOES

Works without signal

Orders, visits and new shops are saved on the phone and sent the moment signal returns. Nothing leaves the phone until the server confirms it has it, so no order is ever lost.

Route plans and real visits

Each rep gets a plan for the day. Every check-in records when the rep arrived and left, and what came of the visit: an order, a payment or no sale.

Targets, commission and payments

Set monthly targets per rep. Reps see how close they are and what they have earned so far. Payments are recorded against invoices, so you always know who still owes what.

Start from your spreadsheets

Bring your products and customers in from Excel. Every row is checked before anything is saved, and rows already in the app are skipped, never doubled.

HOW YOU START

1. **Sign up free** at quantum-salesmaster.com, or try the live demo company first.
2. **Set up your company:** logo, currency, working days and VAT rate.
3. **Bring in products and customers** from our Excel templates.
4. **Invite your reps.** They open a link on their phone: no app store download.

PLANS

Plan	People	Price
Free	2 users: the owner and one rep	₦0
Starter	5 users, up to 5 more at ₦10,750 each	₦64,500 / month
Team	15 users, more in blocks of 10 at ₦5,375 each	₦161,250 / month

Every feature on every plan. Prices are per company and include VAT. Pay yearly and get 12 months for the price of 10.

Your data stays yours

Every company is sealed off from every other one inside the database itself.

Cost prices stay private

Reps see selling prices only. What you pay for stock is for admins alone.

Your currency, your week

Naira, pounds or dollars, with your time zone, working days and VAT rate.
